

140 AMP DUAL BATTERY KIT

- Senses both batteries
- Ignition Protection
- Fully Automatic
- Easy to install

Dual Battery Monitor

140 Amp Dual Battery Manager

The Ironman 140 Amp Dual Battery Kit allows two batteries to be charged at the same time. When the engine is started and the main battery reaches 13.4 volts, the Ironman module engages, allowing the two batteries to be charged simultaneously.

When the voltage drops below 12.8 volts (e.g. the engine is stopped), the Ironman module disengages, isolating the batteries.

FEATURES

- Dual sensing
- Automatic function
- Cut in when main battery above 13.4V
- Isolates main battery below 12.8V
- Ignition protection
- All hardware included
- Monitor dims with headlights on
- Fully sealed
- Easy to install

The Ironman dual battery monitor displays the voltage levels of both batteries.

The Ironman 140 Amp Dual Battery Kit eliminates the possibility of draining the starting battery, as long as your accessories are connected to your auxiliary battery.

Installed Battery Monitor

KIT COMPONENTS

- 140 Amp Dual Battery Manager
- Dual Battery LED Monitor
- 5 meters of Heavy Duty Red Cable
- 5 meters of Heavy Duty Black Cable
- 10 meters of split tubing
- 6 Cable lugs and heat shrink

MOTORIZED 275 AMP DUAL BATTERYKIT

- **Auto senses both batteries**
- **Dual manual override system**
- **Ignition Protection**
- **Easy to install**

Dual Battery Monitor

275 Amp Dual Battery Manager

FEATURES

- High Amp
- Dual sensing
- Automatic function
- Cut in when main battery above 13.7V
- Isolates main battery below 12.2V
- Dual manual override
- Additional override switch
- Sliding plate contacts
- Ignition protection
- All hardware included
- Monitor dims with headlights on
- Fully sealed
- Easy to install

Override Switch

The Ironman 275 Amp Dual Battery Kit performs an automated parallel function which allows two separate batteries to be charged as one. When the main battery reaches 13.7 volts, the Ironman 275 Amp Dual Battery Kit engages, allowing two batteries to be charged simultaneously.

When the voltage drops below 12.2 volts, the Ironman 275 Amp Dual Battery Kit disengages, isolating the batteries. This system eliminates the possibility of draining the start battery, as long as your accessories are connected to your auxiliary battery.

Emergency Parallel Function: The Ironman 275 Amp Dual Battery Kit allows the user to override the automatic function and link the two batteries together. This can be done by turning the yellow knob on the unit or by pushing the override switch located in the vehicle.

Installed Override Switch

KIT COMPONENTS

- 275 Amp Dual Battery Manager
- Dual Battery LED Monitor
- 5 meters of Heavy duty Red Cable
- 5 meters of Heavy duty Black Cable
- 10 meters of split tubing
- 6 Cable lugs and heat shrink
- Override rocker switch
